

The National Science Foundation announced the availability of funding for the High Performance System Acquisition: Building a More Inclusive Computing Environment for Science and Engineering program (*Catalog for Federal Domestic Assistance number: 47.080*). The purpose of this program is to ensure that the science and engineering community has ready access to the advanced computational and data-driven capabilities required to tackle the most complex problems and issues facing today's scientific and educational communities.

Accomplishing these goals requires advanced computational capabilities within the context of a multilevel comprehensive and innovative infrastructure that benefits all fields of science and engineering.

The application deadline is May 15, 2013

Eligible applicants include institutions of higher education and federally funded research and development centers.

To request an application package, visit
